

excom I/O System Module Rack, Zone 1, for 8 Modules MT08-2G

The module rack MT08-2G consists of a back-plane and the actual rack system. It can accommodate a gateway, a power supply unit as well as 8 I/O modules. Up to 64 binary inputs/outputs or 32 analog inputs/outputs resp. a mix of both can be connected to it. Unlike the MT16, neither gateways nor power supply units can be connected redundantly to the MT08.

All modules can be plugged and unplugged under power without interrupting the data transmission.

The module rack is designed in a combined protection rating of Ex e and Ex i and can therefore be used in zone 1.

The power supply of modules on the back-plane is limited to prevent sparking. This allows you to pull and plug modules in powered state with *excom*® mounted in zone 1.

The rack system is made of continuously cast aluminum. This ensures increased stability and shielding. The module rack is suited for switch cabinet and 19" rack mounting.

- Module rack for max. 8 I/O modules, 1 gateway and 1 power supply module
- The terminals for the signal connection level are available as accessories
